Annotated Report Guide for...

Ongoing Needs Details

Ongoing Needs Details

Financial Planning Application

Throughout this report page we use Present Values which were determined by discounting the future dollar amounts back to today's dollars using the inflation rate entered in Assumptions.

• Total required today in order to meet the needs for entire survivorship period.

Additional Need shows the Present Value Adjustments when they apply to the plan. It accounts for additional capital needed to compensate for timing differences occurring where future earned income is not available to meet needs at the appropriate time causing a deficit.

3 Fixed income resources available for the surviving client to help cover needs determined above.

General Savings available to cover needs not already met with fixed income sources. This amount is any excess funds from available assets after Lump Sum Needs are met, as well as any future surpluses that are saved.

(Income Sources plus Account Savings less Ongoing Needs less Present Value Adjustments (when applicable) gives you the shortfall for the survivorship period.

Ongoing Needs Details What will our ongoing needs be if Stuart passes away?

Ongoing needs represents the amount of money necessary today to cover future lost income, increased expenses, or both due to the passing of a loved one. An important factor in determining the amount of life insurance to purchase is ensuring that you will be able to reach not only your current, but also future financial goals. The analysis below provides a detailed look at future needs and income sources.
